DEPARTMENT OF INDUSTRIES AND COMMERCE.

Development of Tobacco Cultivation in Mysore State during the calender year 1937.

(*G. O. No. D.* 5901-3—*A. & E.* 156-36-3, *dated the 4th March* 1937.)

The following extract from the above G. O. regarding the Tobacco Aided Barns Scheme, is hereby published for general information of the public. Any extra information required may be obtained from the Director of Industries and Commerce in Mysore, Bangalore.

* * *

3. The operations of the scheme during the last two years have shown that Virginian tobacco can be successfully grown in certain parts of the State and that its curing and sale, if properly organised, can be managed at profit. Government, therefore, consider it necessary that the operations should be further extended in the areas in which they were undertaken last year and also tried in one or two new areas.

4. At the same time, Government feel that the original object with which the scheme was started, *viz.*, that of interesting the agriculturists in the cultivation and curing of tobacco on their own account should be kept in view and an attempt made to induce raiyats in the above areas to start the work as a private enterprise with the assistance of Government.

It has been found by experience that a unit of two barns with tobacco cultivated on about 50 acres forms the smallest economical unit and the raiyats that come forward to erect one unit of two barns and undertake the curing and sale on their own account may, during the first two years, be given the following facilities :—

(*a*) Government will give the design of the barns and supervise the construction free of cost.

(*b*) Government will advance half the cost of the barns and appliances not exceeding Rs. 1,500 each on the security of the barn, etc., and recover the amount in 5 annual instalments with interest at 6 per cent. The rules for the grant of taccavi loans will be followed as far as possible.

(*c*) They will supply seedlings at cost price to the aided curer or raiyats selected by him to the extent of 25 acres a barn. Arrangements will be made to advise the raiyats as regards the cultivation.

(*d*) They will give the necessary technical help in the curing, grading and sale of the leaves, the actual charges incurred being recovered from the aided curer either in cash or from the sale proceeds.

In order to ensure satisfactory supervision, the establishmeni of aided barns in the vicinity of the Departmental centres should as far as possible be encouraged.
